PROFESSIONAL SUMMARY

Senior Flutter Engineer with 8+ years of experience building scalable cross-platform mobile applications. Flutter and Dart specialist focused on modular architecture, reusable packages, real-time features and native platform integration. Currently serving as Mobile Engineering Manager, combining hands-on development with technical leadership and architectural decision-making. Led initiatives involving iOS Live Activities, native push notifications, analytics architecture, CI/CD, Firebase and WebSockets.

CORE SKILLS

Flutter Engineering: Flutter, Dart, Flutter Architecture, Modular Applications, Package Development, Cubit, BLoC, Provider, Riverpod, Performance Optimization

Architecture: Clean Architecture, SOLID, Domain-Driven Design (DDD), Design Patterns, Dependency Injection, Feature Isolation, Scalable Application Design

Platform Integration: Platform Channels, Swift Integration, Kotlin Integration, ActivityKit, Live Activities, Widget Extensions, Native Push Notifications, Deep Links, In-App Purchases

Delivery and Leadership: REST APIs, WebSockets, Firebase, CMS, Analytics, CI/CD, Code Review, Mentoring, Technical Documentation, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

R10 SCORE | Cuiaba, Brazil (Hybrid)

Mobile Engineering Manager | March 2025 - Present

Previously: Tech Lead, Flutter Mobile | November 2024 - March 2025; Senior Flutter Developer | October 2024 - November 2024

- Led the mobile engineering function, defining technical direction, delivery planning, architecture decisions and engineering standards while remaining hands-on in Flutter development.
- Redesigned the Flutter application as a modular platform with shared foundations, feature isolation, reusable packages, initialization layers and explicit dependency boundaries.
- Structured CI/CD pipelines for multiple flavors and environments, improving build consistency, release organization and delivery maintainability.
- Architected a centralized analytics abstraction layer with a unified event model, supporting multiple providers while reducing vendor coupling across product features.
- Designed and led a hybrid Flutter and native iOS architecture for Live Activities using ActivityKit, Widget Extensions, Platform Channels, token lifecycle management and a dedicated backend.
- Designed native Android and iOS notification pipelines that process localized payloads according to the active application language before display.
- Established engineering standards through architecture guidance, code reviews, development conventions and centralized documentation shared across repositories with Git submodules.

GENIAL INVESTIMENTOS | Remote

Senior Flutter Developer | June 2022 - October 2024

Contracted through TIVIT and Squad Premium

- Delivered Flutter features across financial domains including credit cards, bank slips, insurance products and CMS-driven content experiences.
- Built polished mobile journeys with animations, state transitions and reusable UI components for high-visibility financial workflows.
- Applied Cubit-based state management and EventBus communication to coordinate events between independently structured application features.
- Contributed to a large-scale Flutter codebase through reusable components, REST API integrations, feature organization, debugging and CI/CD practices.

OSIRIS AGTECH | Cuiaba, Brazil

Flutter Developer, Part-Time | September 2021 - May 2022

- Contributed to Flutter mobile solutions for agritech, IoT and hydroponic automation.

FUNDACAO UNISELVA | Cuiaba, Brazil

Flutter Developer, Part-Time | November 2017 - May 2022

- Developed and maintained mobile applications, including end-to-end ownership of the Recoopsol app, with supporting exposure to Django and PostgreSQL.

EDUCATION

Bachelor of Science in Software Engineering, In Progress | Estacio University | Expected January 2028

Electrical and Electronics Engineering, Coursework | Universidade Federal de Mato Grosso (UFMT) | 2016 - 2023

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

SOLID Express — Full Cycle | March 2024

Domain-Driven Design — Full Cycle | February 2024

Software Architecture Fundamentals — Full Cycle | October 2023

Flutter, TDD, Clean Architecture, SOLID and Design Patterns — Udemy | December 2022

Responsive Flutter for Mobile, Tablet, Web and Desktop — Udemy | May 2022

Building Android, iOS and Web Apps with Flutter — Udemy | April 2022
